

Supakwik Water Heaters Pty Ltd

SupaTap Underbench Series

A range of compact and efficient underbench appliances that deliver filtered boiling & chilled drinking water from a single tap.

Australian Design and Manufactured

Supakwik has been manufacturing products in Queensland since 1999.

Refreshing Filtered Boiling & Chilled Water

All of the water that is dispensed from the SupaTap is filtered. The boiling water tank is made from pure copper, which guarantees great tasting water.

Simple to Use

The SupaTap has easy to operate, robust levers and features a LED display reflecting the appliance status.

Safety

By offering you the choice of safety lock features, the SupaTap is the number one choice whether in age care, schools, the office or the home.

Independent Systems

The Boiling and Chilling appliances are compact and separate. This allows the SupaTap to fit where others simply won't. Other benefits include better use of cupboard space, greater flexibility in matching heater and chiller capacities, and lower maintenance costs.

Excellent Support

When you contact us you can speak directly to the team that designs and manufactures the product.

User Power Saving Feature

When all you want is chilled water, with the flick of a tap lever, you can suspend the boiling water function of the appliance saving you even more power.

Sustainability & Environmentally Friendly

We design our products around robustness, reliability, and a long design life. By using long life recyclable materials, Supakwik together with our customers plays an active role in preserving our environment.

Intelligent Power Saving

Internationally patented motion detection power saving features places you at the forefront of energy saving technology.

Supakwik Water Heaters Pty Ltd

	Model	Persons	Dimensions HxWxD (mm)	Power Supply
Boiling & Ambient	BF100	1-20	340 x 195 x 415	Single GPO
	BF120	20-40	340 x 195 x 415	Single GPO
	BF170	40-60	340 x 195 x 415	Single GPO
	BF200	60-80	400 x 195 x 415	Single GPO
Boiling & Chilled	BC100	1-20	340 x 400 x 415	Double GPO
	BC120	20-40	340 x 400 x 415	Double GPO
	BC170	40-60	340 x 400 x 415	Double GPO
	BC200	60-80	400 x 400 x 415	Double GPO
Boiling, Chilled, Ambient	BCF120	20-40	400 x 400 x 415	Double GPO
	BCF170	40-60	400 x 400 x 415	Double GPO
	BCF200	60-80	400 x 400 x 415	Double GPO

The dimensions for the BC and BCF models are the boiling and chiller units combined, chiller dimensions (HxWxD) 410 x 205 x 280mm.

- All of the SupaTap models incorporate a dual check pressure limiting valve.
- The water supply is a 1/2" BSP connection, 80 - 1000kPa.
- All of the SupaTap models incorporate a submicron filter.

F02S - Submicron Standard

F02FC-S - Submicron Premium High Capacity

F02F - 5 Micron

SupaTap models BC & BCF consist of independent boiling and chiller units. The chiller function is controlled by the boiling unit. This offers the end user the following benefits:

- A chiller can be added to the BF range if required, the ambient water will then become chilled.
- Flexibility in choosing boiling and chiller model mix - contact us for more options if required.
- Lower maintenance costs.
- Allows more installation options of available cupboard space, where one large unit may not fit at all.

Cupboard ventilation will be required when installing chiller models.
